

Dear VARIAX customers

Consolidation of Variax Products

We thank you, our valued customer, for your continued patronage.

In recent years, we have released the Opus1 and Opus2 series Variax products for the stamping market that requires flexible feeding devices for presses for various applications. This resulted in our VS series functionality being duplicated and the performance being surpassed by the Opus1 and Opus2 series feeds.

We respectfully announce the consolidation of the VS and Opus Variax products. We appreciate you choosing and using the VS series in the past. Please see the chart below for alternate Opus series products for each VS series feeder.

We will continue our research and development of Variax products for better functionality and performance. We will also provide complete assistance in servicing our various Variax products including the VS series.

We ask for your continued cooperation and support.

NOTE

1. Discontinued sales product and alternate product

Discontinue product in production / sales		Alternate product	
VS Series	VS150H	Opus1 series	Opus1-200/200H
		Opus2 series	Opus2-200/200H

		Opus2 series	Opus2-450/450H
	VS600H	Opus1 series	Opus1-650/650H
		Opus2 series	NA

2. Last day to place order order for VS series feed.

We will accept orders for VS series products until June 30th 2020.

3. Service of VS series

We will continue to support our customers in maintenance of the VS series the same as before. If necessary, we will have a separate announcement in the future if we start to have difficulty procuring components used in the VS series.

Sincerely Yours,

Yohei Sasaki

Director of sales
